1. AP12676_M2P User manual Introduction

This document provides customers with considerations for the hardware design of AP12676_M2P. It includes hardware block diagram, reference design, and PCB stack up, which will be explained in detail below.

1.1 Module Block Diagram

AP12676_M2P 2230 M.2 Card

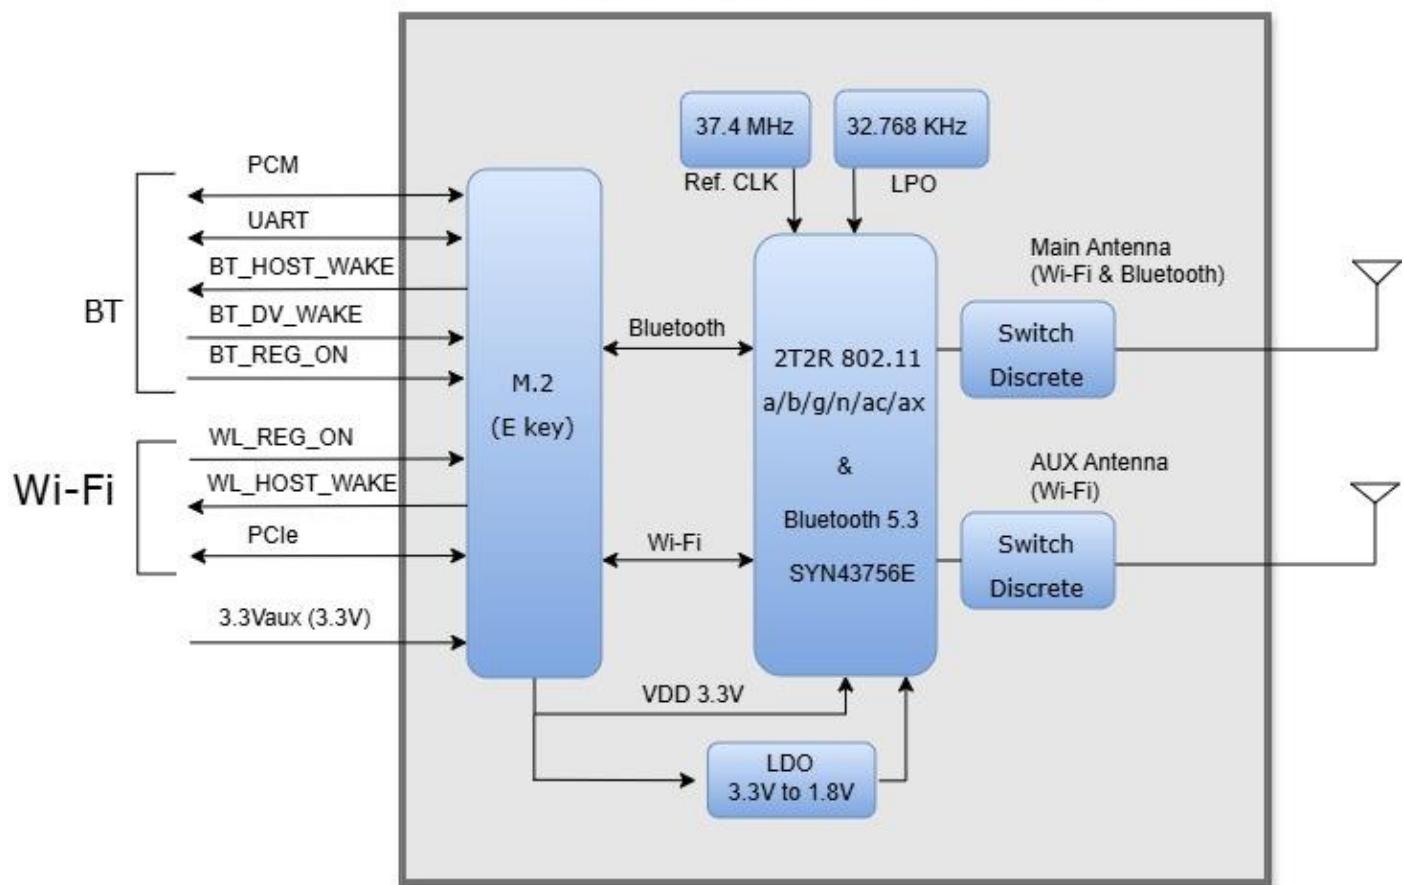

Figure1. AP12676_M2P Module Block Diagram

In Figure 1, The AP12676_M2P is a fully Wi-Fi and Bluetooth functionalities 2230 M.2 card (KEY E) with integrated Bluetooth 5.3. The WLAN host interface is PCIe v3.0 compliant and runs at Gen1 speeds. The Bluetooth host interface is a UART interface and it also supports PCM interface.

1.2 Reference Design

The recommended schematic configuration for all of the interfaces and GPIOs are shown as figure 4. The connection block diagram of the PCI-e interface is shown in figure 5. However, the connection block diagram of UART and PCN interfaces is shown in figure 6. The PCI-e differential pair signals impedance target is 100 ohms impedance. The length difference of each pair of differential signals does not exceed 10 mil, and the integrity of a ground plane should be maintained, as far as possible.
